

Anthropology

Anthropologists study human behavior from a biological, historical, cultural, and social perspective. Students take anthropology courses to prepare for a major or to fulfill general education requirements. A bachelor's degree in anthropology can lead to a career in data analysis, social services, education, journalism, advertising, international relations, government service, field research, contract archaeology, museums, zoological parks, and nonprofit organizations.

Associate Degrees

Associate in Arts Degree

Anthropology for Transfer

Students completing this associate degree will have completed lower-division major preparation requirements for an anthropology degree, an emphasis or option within an anthropology degree, or a degree considered similar to anthropology at a participating California State University (CSU) campus.

Following transfer to a participating CSU campus, students will be required to complete no more than 60 units to obtain a bachelor's degree; however, some CSU campuses may require additional lower-division major preparation. This degree may not be appropriate preparation for students transferring to a CSU campus not accepting this degree or to a university or college that is not part of the CSU system. Students should consult with a MiraCosta counselor for further information regarding the most efficient pathway to transfer as an anthropology major and to determine which CSU campuses are participating in this program.

Graduation Requirements

- ▶ Complete a minimum of 60 CSU-transferable semester units.
- ▶ Complete all courses in the major with a "C" or "P" or better.
- ▶ Complete the Cal-GETC general education pattern.

- ▶ Obtain a minimum CSU-transferable grade point average of 2.0.
- ▶ Complete a minimum of 12 semester units in residence at MiraCosta College.

Program Student Learning Outcomes

Upon successful completion of this program, students will be able to do the following:

- ▶ Demonstrate an appreciation for the biological and cultural diversity of humans around the world.
- ▶ Evaluate how biological and cultural processes have shaped the human species.
- ▶ Compare and contrast methods for collecting and analyzing evidence across the subfields of anthropology as a science.

Course Requirements

Required courses:

ANTH 101	Biological Anthropology *	3
ANTH 102	Cultural Anthropology *	3
ANTH 103	Introduction to Archaeology *	3

List A (4 units minimum): 4-6

ANTH 101L	Biological Anthropology Laboratory *	
-----------	--------------------------------------	--

BTEC 180	Biostatistics *	
or BUS 204	Business Statistics	
or PSYC 104	Statistics for Behavioral Science	
or PSYC 104H	Statistics for Behavioral Science (Honors)	
or SOC 125	Introduction to Statistics in Sociology	
or STAT C1000	Introduction to Statistics	
or STAT C1000E	Introduction to Statistics (Embedded Support)	
or STAT C1000F	Introduction to Statistics (Honors)	

List B: Select one to two courses. 3-4

BIO 210	Human Anatomy	
GEOG 155	Introduction to Geographic Information Systems and Techniques with Lab	

GEOL 101	Physical Geology *	
or GEOL 101 & 101L	Physical Geology and Physical Geology Laboratory	

PSYC 205	Research Methods in Psychology	
or SOC 205	Introduction to Research Methods in Sociology	

List C: Select one course (3 units). 3

ANTH 105	Evolution of Human Behavior *	
----------	-------------------------------	--

ANTH 107	Gender, Sex, and Sexuality *	
----------	------------------------------	--

ANTH 120	Global Health *	
----------	-----------------	--

Total Units 19-22

* Course satisfies a general education requirement on the Cal-GETC general education (GE) pattern. To ensure this degree is completed with no more than 60 units, students should select courses that will also satisfy a GE requirement. Note: All of the statistics courses listed are GE courses.

Anthropology

NOTE: Students are strongly advised to select courses that meet lower-division major preparation requirements at their transfer university and to complete the History, Constitution, and American Ideals requirement prior to transfer.

Certificates

Certificate of Achievement

Global Health

Global health aims to improve human health and global health equity by promoting the development of innovative, interdisciplinary solutions to contemporary health challenges. Global health topics range from acute threats posed by pandemic-prone infectious diseases and unequal access to medical care and technology, to emerging crises arising from climate change and non-communicable diseases.

Students earning a certificate in global health develop a critical understanding of contemporary health challenges and inequities. Students will be able to explain how these challenges are rooted in historical experiences, global political-economic forces, and complex biological, ecological, and sociocultural circumstances. This knowledge will prepare students to propose, design, and develop innovative and equitable solutions to the most pressing health problems facing our modern world. To be effective, these solutions must extend across disciplines to everything from access to healthcare and biotechnologies to local, national, and international policy-making.

Students are strongly encouraged to work with a MiraCosta counselor to ensure that this pathway certificate is incorporated into their selected general education pattern.

Program Student Learning Outcome

Upon successful completion of this program, students will be able to assess the myriad causes and consequences of contemporary global health challenges and inequities, including pandemics, maternal/child health, and non-communicable diseases.

Course Requirements

Required course:

ANTH 120	Global Health	3
----------	---------------	---

Select one course (3 units). 3

ANTH 101	Biological Anthropology	
----------	-------------------------	--

ANTH 101H	Biological Anthropology (Honors)	
-----------	----------------------------------	--

NUTR 100	Nutrition Today	
----------	-----------------	--

PSYC 260	Physiological Psychology	
----------	--------------------------	--

Select one course (3 units). 3

ANTH 102	Cultural Anthropology	
----------	-----------------------	--

CSIT 160	Technology, the Individual, and Society	
----------	---	--

GEOG 104	World Geography	
----------	-----------------	--

Select one course (4-5 units). 4-5

BTEC 180	Biostatistics	
----------	---------------	--

PSYC 104	Statistics for Behavioral Science	
----------	-----------------------------------	--

PSYC 104H	Statistics for Behavioral Science (Honors)	
-----------	--	--

SOC 125	Introduction to Statistics in Sociology	
---------	---	--

STAT C1000	Introduction to Statistics
STAT C1000E	Introduction to Statistics (Embedded Support)
STAT C1000H	Introduction to Statistics (Honors)

Total Units **13-14**

Courses

ANTH 101: Biological Anthropology

Units: 3

Prerequisites: None

Enrollment Limitation: Not open to students with prior credit in ANTH 101H.

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Fall, Spring, and Summer

This course examines the biological basis for animal forms and behaviors, including basic genetics and evolution theory; primate classification, ecology, and social behavior; the fossil and archaeological evidence for early human life; and the evolutionary basis for modern human variation in appearance and behavior. UC CREDIT LIMITATION: Credit for ANTH 101 or ANTH 101H. C-ID ANTH-110.

ANTH 101H: Biological Anthropology (Honors)

Units: 3

Prerequisites: None

Enrollment Limitation: Not open to students with prior credit in ANTH 101.

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Fall odd years

This honors course offers students an advanced introduction to the study of human biology, behavior, and evolution. Topics to be explored include the scientific method; evolution theory; basic genetics; primate classification, ecology, and social behavior; the fossil and archaeological evidence for early human lifeways; and the evolutionary basis for modern human variation in appearance and behavior. UC CREDIT LIMITATION: Credit for ANTH 101 or ANTH 101H. C-ID ANTH-110.

ANTH 101L: Biological Anthropology Laboratory

Units: 1

Prerequisites: ANTH 101 or ANTH 101H.

Enrollment Limitation: Concurrent enrollment in ANTH 101 or ANTH 101H if prerequisite not met. Not open to students with prior credit in ANTH 101LH.

Acceptable for Credit: CSU, UC

Laboratory 3 hours.

Course Typically Offered: Fall, Spring, and Summer

Designed to accompany ANTH 101/ANTH 101H, this laboratory allows students to garner practical experience with the scientific method, genetic models, simulations of evolutionary processes, primate skeletal anatomy, primate behavior and ecology, human osteology, human variation, and casts and artifacts representing selected stages in human evolution. C-ID ANTH-115L.

ANTH 102: Cultural Anthropology

Units: 3

Prerequisites: None

Enrollment Limitation: Not open to students with prior credit in ANTH 102H.

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Fall, Spring, and Summer

This course explores how anthropologists study and compare human cultures, including variation in subsistence patterns, social and political organization, economic systems, systems of communication, kinship and family structure, belief systems, aesthetic expression, and recognition of race, ethnicity, gender, and sexuality. Cultural anthropology also explores how cultures have been impacted by colonialism and are being shaped by globalization and demonstrates the value of the discipline in the form of applied anthropology. Anthropologists employ high ethical standards while exploring diversity in human culture and highlight the importance of understanding and appreciating that diversity. C-ID ANTH-120.

ANTH 103: Introduction to Archaeology

Units: 3

Prerequisites: None

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Fall

This course explores archaeological theory and method, including techniques of field excavations and laboratory analysis. It also uses archaeological data to understand cultures of the past, including Stone Age lifeways, early farming cultures, and emergent civilizations around the world, such as the ancient Egyptians, Maya, and Inca. The course also examines current issues in cultural resource management, ethics in archaeology, and the role of archaeology within the broader field of anthropology. C-ID ANTH-150.

ANTH 104: Native American Cultures

Units: 3

Prerequisites: None

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Spring

This course explores the diversity of Native American cultures, including Paleo-Indians (known largely from archaeological evidence) and more recent groups (known from historical documents and ethnographic accounts). The course employs the perspective of "cultural ecology" to investigate how environments influence many facets of human culture, including economic systems, social systems, family structure, and artistic and ceremonial activities.

ANTH 105: Evolution of Human Behavior

Units: 3

Prerequisites: None

Enrollment Limitation: Not open to students with prior credit in ANTH 105H.

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Fall

This course explores the biological basis and evolutionary value of human behavior. Students explore current research in genetics and epigenetics, neuroanatomy and endocrinology, along with studies of human culture and animal behavior, to understand phenomena such as human emotions, personality, parenting strategies, mating behaviors, and lifetime responses to stress.

ANTH 107: Gender, Sex, and Sexuality

Units: 3

Prerequisites: None

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Fall, Spring

This course explores and compares the diverse cultural categories of gender and sex including their grounding in biological functions, belief systems, kinship, and popular representation across the globe. It explores sexuality as more than a biological process, viewing sexuality as a human cultural expression. This course contextualizes gender, sex, and sexuality within broader cultural systems as well as global interactions to understand how these categories are shaped and, in turn, shape our lives.

ANTH 120: Global Health

Units: 3

Prerequisites: None

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Fall, Spring

This course explores contemporary human health problems around the world, focusing on economic, political, historical, sociocultural, and environmental factors that underlie disparities. Global health analyzes the causes and consequences of the unequal burden of disease and disability, including infectious disease, climate change, women's health, and food insecurity. Employing an interdisciplinary approach, this course introduces major concepts, principles, and research methodology in global health.

Anthropology

ANTH 190: Primate Behavior and Ecology

Units: 3

Prerequisites: None

Enrollment Limitation: Not open to students with prior credit in ANTH 190H.

Acceptable for Credit: CSU, UC

Lecture 3 hours.

Course Typically Offered: Spring

This course explores principles of animal behavior and ecology from an evolutionary perspective. Topics include predator avoidance, foraging strategies, mating behaviors, mother-infant bonding, the development of social groups, culture and cognition, and current issues in conservation. The course also emphasizes research methodology through a semester-long project observing primates at the San Diego Zoo or through online alternatives.

ANTH 292: Internship Studies

Units: 0.5-14

Prerequisites: None

Corequisite: Complete 54 hours of work per unit, paid or unpaid.

Enrollment Limitation: Instructor, dept chair, and Career Center approval. Fourteen unit maximum in any combination of work experience education and/or internship studies per semester.

Acceptable for Credit: CSU

Course Typically Offered: To be arranged

This course provides students the opportunity to apply the theories and techniques of their discipline in an internship position in a professional setting under the instruction of a faculty-mentor and site supervisor. It introduces students to aspects of the roles and responsibilities of professionals employed in the field of study. Topics include goal-setting, employability skills development, and examination of the world of work as it relates to the student's career plans. Students must develop new learning objectives and/or work/intern at a new site upon each enrollment.

ANTH 296: Topics in Anthropology

Units: 1-3

Prerequisites: None

Acceptable for Credit: CSU

Lecture 1 hour.

Lecture 2 hours.

Lecture 3 hours.

Course Typically Offered: To be arranged

This course gives students an opportunity to study topics in Anthropology that are not included in regular course offerings. Each Topics course is announced, described, and given its own title and 296 number designation in the class schedule.
