

# Liberal Arts with an Area of Emphasis in Mathematics and Sciences

## Academic and Career Pathway: Math and Sciences

### Associate in Arts Degree

#### Liberal Arts with an Area of Emphasis in Mathematics and Sciences

The science courses in this category examine the physical universe, its life forms, and its natural phenomena. These courses assist the student in developing an appreciation of the scientific method and encourage an understanding of the relationships between science and other human activities. The mathematics courses encourage the understanding of mathematical concepts through the development of quantitative reasoning skills. This area of emphasis provides students with lower-division preparation for a variety of majors within the scientific disciplines, including astronomy, biology, chemistry, and physics, as well as preparation for mathematics majors. Additionally, students may prepare for nursing, kinesiology, public health, and other health science majors. Many of the courses will assist students in prerequisite preparation for graduate programs within the health sciences. A point system using multi-criteria approved by the California Community Colleges Chancellor's Office is used to accept students into the RN program.

#### To earn this associate degree, students must fulfill the following requirements:

- ▶ Complete a minimum of 60 degree-applicable units of credit (including major and general education courses).
- ▶ Complete all courses required in the major with a "C" or "P" or better.
- ▶ Complete a general education pattern of courses (see Associate Degrees).
- ▶ Obtain a minimum GPA of 2.0.
- ▶ Complete a minimum of 12 units in residence at MiraCosta College.

#### Program Student Learning Outcome Statement

- ▶ Upon completion of this program, the student will be able to develop communication, critical thinking, and intellectual skills that effectively prepare him/her for lifelong learning and for advanced study in a wide range of majors at the university level.

Select a minimum of 18 units from the following courses. At least one course must be a mathematics course. Courses outside of the mathematics discipline that are approved for the quantitative reasoning requirement on Plans B and C may be used in lieu of a course with the MATH prefix.
